

WHAT ARE THE ET51/ET56 ANDROID ENTERPRISE TABLETS?

Surprisingly rugged, thin and light tablets, built for work.

The ET51/ET56 Android tablets offer the perfect blend of form and function. Some of the thinnest and lightest of Zebra's rugged tablet computers, the ET51 (WLAN only) and ET56 (WWAN/WLAN) provide workers with the same great styling they love on their personal tablet. And enterprises get all the business-class features they need to boost workforce productivity inside and outside the four walls—from a rugged design and daylight viewable display to advanced data capture options and a wide range of enterprise accessories.

WHY SHOULD YOU BUY ET51/ET56 ANDROID TABLETS?

TOP 5 CUSTOMER BENEFITS

1

Beauty and brawn.

With the ET51/ET56, you can have it all. These enterprise tablets are surprisingly thin and lightweight—the thinnest and lightest in Zebra's full line of rugged tablet computers. Users get the great styling of a consumer tablet with a bright, daylight-viewable display. But don't let their good looks fool you. Virtually nothing will stop the ET51/ET56. These rugged tablets are built to handle drops to concrete, rain, snow, dust, extreme heat, subzero temperatures, spilled liquids and even a hose-down at full force.

2

See all you need to see.

Choose the 8.4 in. model if device weight matters most and your application screens fit nicely on a smaller screen. If you need more room to display your information, the 10.1 in. model provides plenty of real estate—no scrolling necessary to move through your screens. No matter which screen size you choose, you get the high resolution (up to 2560x1600) and class-best brightness you need for easy reading indoors and outside, even on sunny days.

3

Mobility DNA for an unmatched feature set—and value.

Zebra Mobility DNA provides powerful features that no other competitive product can offer — features that simplify everything from data capture to device management. And with LifeGuard™ for Android™ (available with your warranty and a Zebra OneCare contract), you can count on Zebra to provide OS support every day your tablets are in service, including security patches. Security support matches your device lifecycle—and you decide when to upgrade to a newer version of Android.

4

A workhorse that never needs time off.

No room for downtime in your operation? Just add a second hot-swappable battery via the expansion back. You get more than double the battery run time—and you'll never need to take the ET51/ET56 out of service for charging. In addition, when the internal battery reaches its end-of-life, there's no need to retire and replace the tablet. You can simply replace the internal battery right in your facility, with minimal downtime—no need to send the tablets to the service depot.

5

Accessorize to make your workers more productive.

With an unmatched enterprise accessory family, you can create the perfect tablet solution for your needs. Easily add new features with the innovative expansion back, from a scanner to a second hot-swappable battery. The unique ShareCradle provides a common base to charge all your Zebra mobile computers and tablets. Docking stations provide desktop connectivity and charging. Turn the ET51/ET56 into a vehicle-mount computer with vehicle cradles for trucks and forklifts*. One flexible case provides your workers with three 'wearable' options. And more.

APPLICATIONS
